1 Read the title of the text and the introduction. Have you used any emojis today?

The international language of emotion

Are emojis the new global language? More than 90% of social media users use emojis to add emotion to messages, and there's an emoji for almost every feeling and social situation. How emoji-literate are you? Can you spot which two emojis are with the wrong messages?

So my phone hadn't been stolen after all – I've just found it under the sofa. What a **relief**!

I'm so excited as we're about to go to the Ed Sheeran concert. I'm jumping for **joy**!

I've just finished my 10 km 'fun run'. So this is what total **exhaustion** feels like!

We're feeling a great sense of **pride** today. Our son has just graduated! Congratulations, Ben!

Does anyone else suffer from **depression** in winter? Grey skies make me feel really miserable.

Has anyone got any tips for managing **anxiety**? I've got exams next week and I'm feeling so stressed.

Right now, I'm chilling out at the beach and listening to music. This is my idea of **relaxation**!

Thanks for the birthday wishes! Sending love and **affection** to you all!

Much to my **amusement**, our dog is singing along to the radio. She must really like Taylor Swift!

I don't understand my Maths homework! Is anyone else in a state of total **confusion** or is it just me?

I've just got to school and realized I'm still wearing my slippers! Imagine my **embarrassment**!

I'm feeling a lot of **anger** this morning. To the person that stole my bike lights – have a horrible day!

2  1.1 Read the text and complete the table with the noun forms. Listen and check.

Adjective	Noun	Adjective	Noun

READING

I can understand comparison in texts.

- Look at the picture. Read the title of the text and the introduction. Where do these teenagers live, and why are they smiling?
- 1.2 Read and listen to the whole text. Put topics a–e in the order that they are mentioned in the text.
 - A healthy lifestyle
 - Feeling respected
 - Stress-free studying
 - Different, but just as good!
 - Lots of freedom
- 1.2 Read and listen to the article again. Are the sentences true (T) or false (F)? Correct the false sentences.
 - Frankie hasn't been living in the Netherlands for very long.
 - The most important thing for Dutch parents is the grades that their kids achieve at school.
 - Frankie thinks that Dutch teenagers are given a lot of freedom.
 - Dutch teenagers only use their bikes when the weather is good.
 - In Ruben's opinion, Dutch schools are more relaxed than American schools.
 - Ruben's teachers in San Diego haven't been supportive.
 - Dutch teenagers form strong relationships more quickly than American teenagers.
 - Ruben has found it easy to make new friends at his new school.
- Word Power** Study the table. Then look at the words in bold (1–8) in the text. Is each word an adjective, an adverb or a noun?

Suffixes

suffix	form	example
-able/-ible, -ic, -ive	adjective	<i>reliable, energetic, creative</i>
-ly	adverb	<i>happily, enthusiastically</i>
-ance/-ence, -ment, -(t)ion, -ness	noun	<i>annoyance, embarrassment, frustration, unhappiness</i>

- COMPARE CULTURES** How is life for teenagers in your country similar to life in the Netherlands? How is it different? Where would you rather live and why?

Have the Dutch found the recipe for happiness? A UNICEF report has just identified the Netherlands as the happiest country in the world for teenagers!

Although I'm American by birth, I've lived in Amsterdam since I was eight. Here are three things I've learned to love about Dutch culture.

There's less anxiety about academic **1achievement** in the Netherlands. Students do less homework and take fewer tests, and teachers and parents prioritize teenagers' well-being over their grades. In other words, they think it's more important to raise happy kids than smart ones!

Teenagers enjoy a great deal of **2independence** here. For example, I've been making my own way to school since I was ten. My parents trust me to behave **3sensibly** – most of the time! At school, teachers treat students as equals, and they respect our opinions.

The Dutch are very **4enthusiastic** about outdoor activities, and cycling is a national passion. Whatever the weather, Dutch teens love to get on their bikes. Scientists say that physical activity not only improves our **5fitness**, but it also protects us against depression and lifts our mood!

COMMENTS

Ruben Smit

Interesting article, Frankie! I was born in Amsterdam, but I've been living in San Diego for six months now. I've been very happy in both places.

I sometimes miss the freedom I had in Amsterdam. My new school has so many rules that I haven't learned them all yet. And we have a lot more tests here, so it can get quite stressful.

On the other hand, my new teachers are great. They've encouraged me to have more **6ambition**. So I've been learning how to become an internet entrepreneur! My classmates have been so **7supportive**, too. Dutch teenagers often take time to build relationships, while Americans seem to be **8capable** of making friends for life in seconds. I've made lots of new friends here.

THE FAB FOUR

This week we've chosen four decades in British music that we think have had a major impact on music today.

1 The Swinging Sixties

This was a time of creativity and innovation for British music. Britain was experiencing a period of economic growth and in the 1960s, teenagers wanted to be different from their parents. They were the first generation to create a genuine youth culture and they expressed their identity through their fashion and their tastes in music. The Beatles defined this decade. They had a huge influence on popular culture and their distinctly British sound had simple melodies, clever lyrics and rhythmic guitar work. They loved playing chords and using vocal harmonies and their music cheered people up.

2 Sounds of the Seventies

The early 1970s was the era of Glam rock with artists like David Bowie and Queen. In the mid-1970s, a new type of music emerged at the same time as an economic decline in the UK: punk. It was aggressive and loud and many people saw punk as anti-establishment, anti-politics and anti-pop. A lot of young people felt angry and rebellious because they were unemployed and thought that they had no future. They had strong opinions so they used punk to express their concerns and frustrations. Siouxsie and the Banshees, with Susan Ballion on lead vocals, were a famous British punk band.

3 Electric Eighties

The early 1980s produced a new wave of manufactured pop bands and techno pop using synthesizers, percussion and saxophones. These included bands like Depeche Mode.

However, it was the Manchester indie rock band, the Smiths, which became one of the most important bands of this decade. They reacted against the superficial techno pop of the early 1980s and instead they wrote socio-political songs. Their songs were observations on the lives of ordinary people and expressed their feelings about the government and the monarchy in Britain at the time. Many of their songs were rather depressing, so, unless you were in the right mood, their songs could really get you down.

4 COOL BRITANNIA

With the end of the Cold War and the introduction of the World Wide Web, the 1990s was an optimistic decade and 'Britpop' was born. Bands like Oasis and Blur used their local identities and regional accents to create a sense of belonging and pride with songs about British places and culture. Until now, all-male bands had dominated the British pop scene, but in 1996, the all-girl band, the Spice Girls, with the 'girl power' message of their debut single 'Wannabe' and album 'Spice', became the fastest-selling British group since the Beatles.

1 In pairs, discuss the questions.

- Which British bands or singers do you know?
- Which British bands or singers are popular in your country?
- Which British bands or singers do you enjoy listening to?

2 Read the article quickly. Match the singers and bands with the decades.

- | | |
|-----------------------------|---------|
| 1 The Spice Girls | a 1960s |
| 2 The Smiths | b 1970s |
| 3 The Beatles | c 1980s |
| 4 Siouxsie and the Banshees | d 1990s |

3 1.8 Read and listen to the article. Are the sentences true (T) or false (F)?

- The 1960s was a decade of prosperity in Britain.
- In the 1960s, British teenagers wore similar clothes to their parents.
- There was a strong connection between socio-political events and the start of punk in Britain.
- British people of all ages identified with punk music in the 1970s.
- The Smiths were one of the most important techno pop bands of the 1980s.
- The Smiths' songs were usually happy and joyful.
- In the 1990s, British pop groups wanted to show they were proud of their culture.
- The Spice Girls were much more successful than the Beatles.

4 **THINK CRITICALLY** In groups, discuss the questions.

- How do social and political events influence a country's music?
- What can you learn about another culture from its music?

5 **Word Power** Find the words in the article. Can you explain their meaning?
