Teeth

Smile! Can you see your teeth?
Your teeth help you eat.

You can't swallow a whole sandwich!
You bite and chew small pieces.

Different teeth have different jobs.

incisors

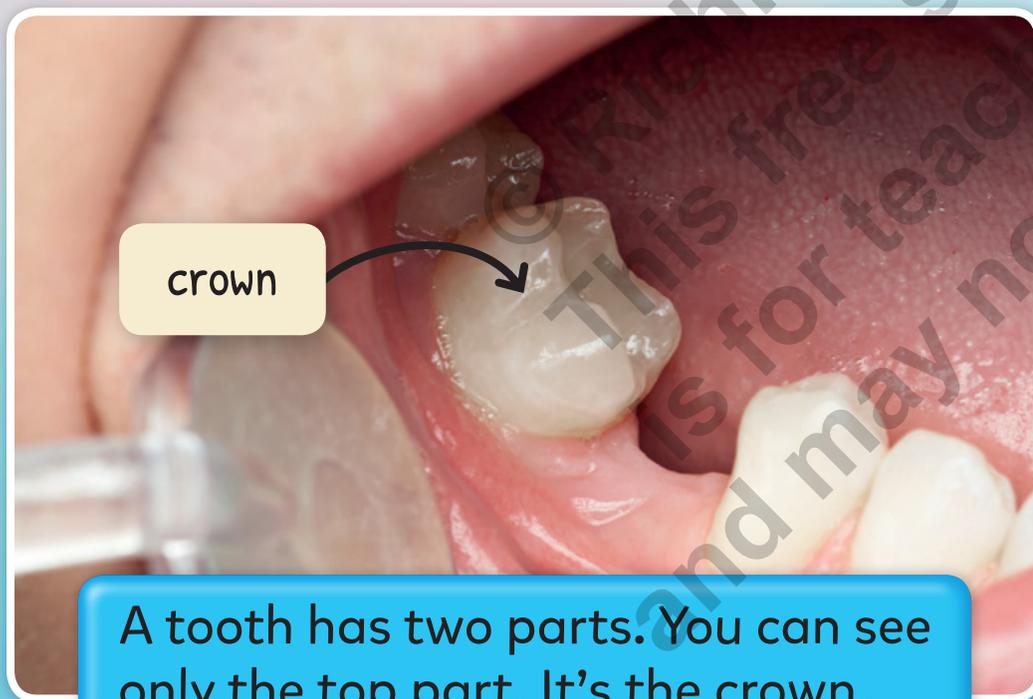

Incisors cut food. They're thin.
They help you bite.

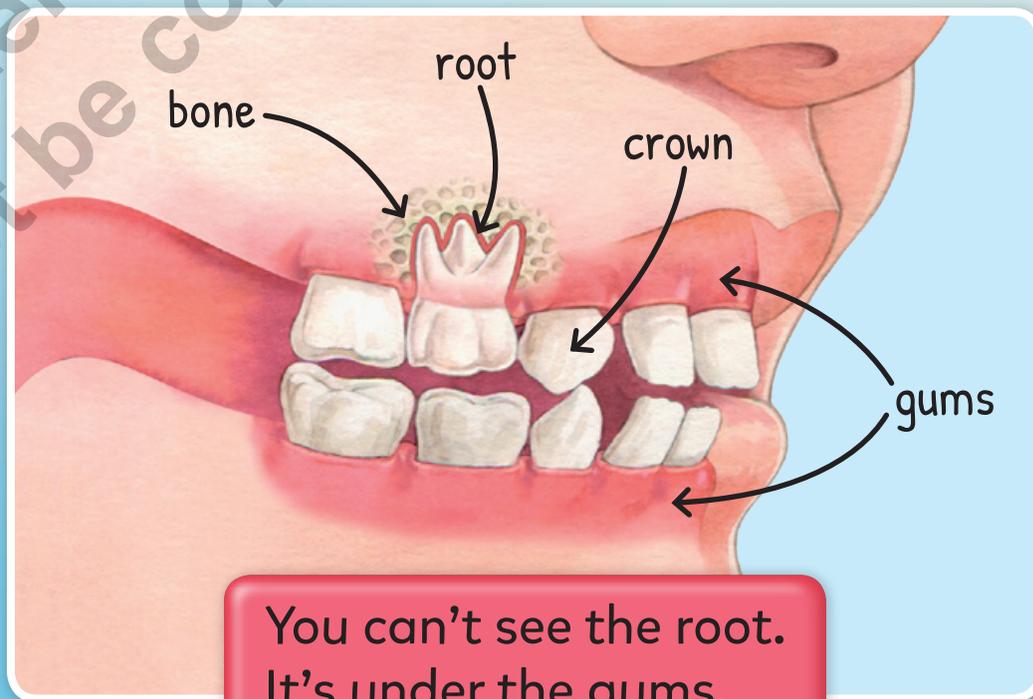

Canines tear food. They're sharp!

Molars are flat. They help you chew.

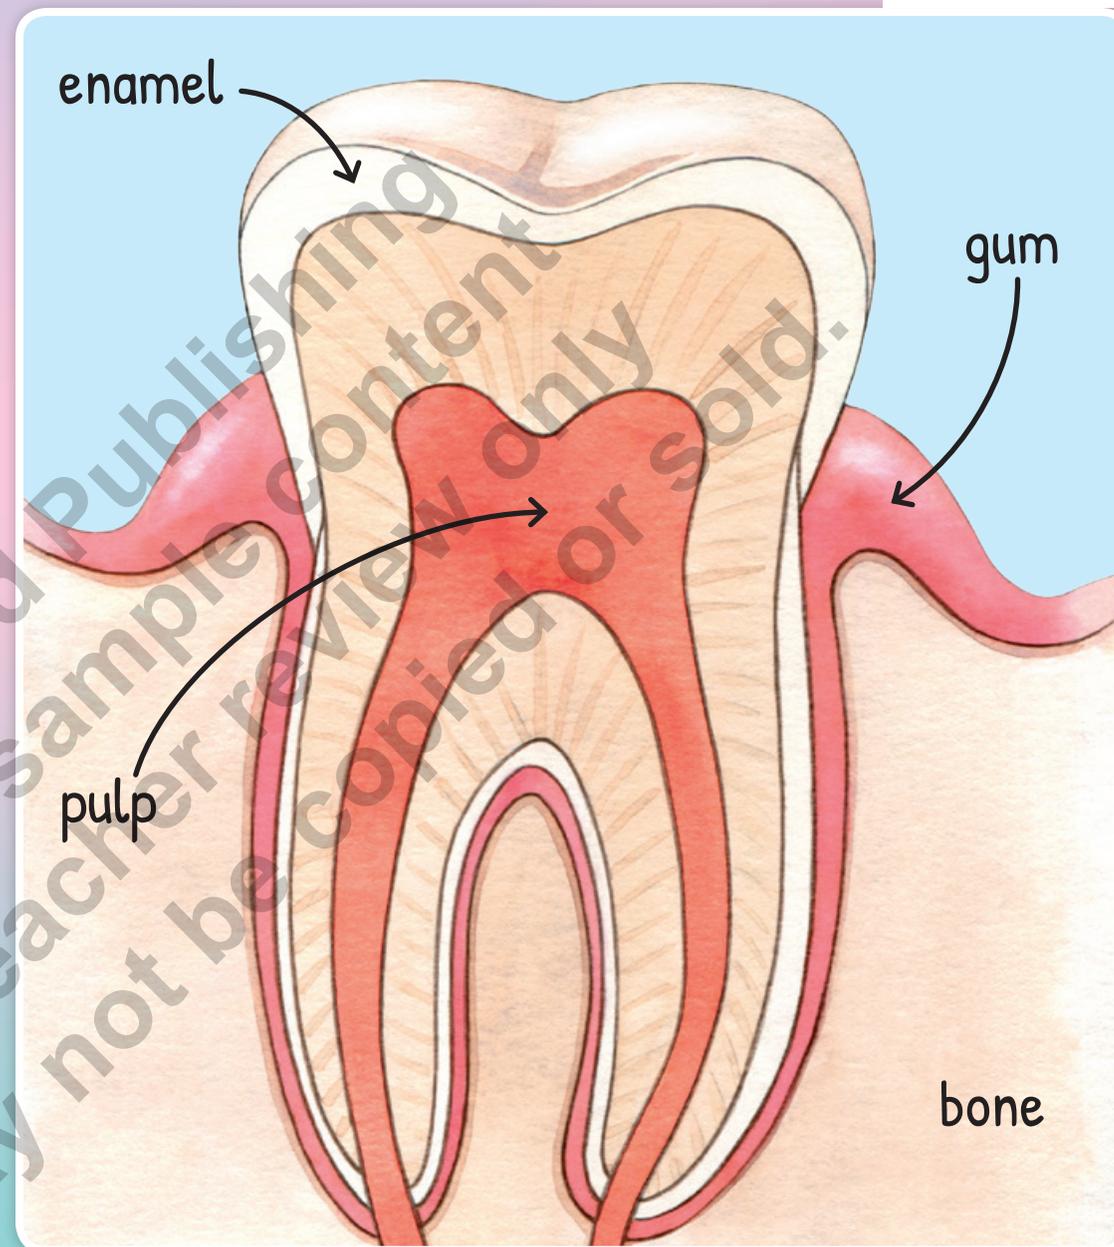

A tooth has two parts. You can see only the top part. It's the crown.

You can't see the root. It's under the gums.

Enamel is on the outside.
It's hard and white.
It protects the tooth.

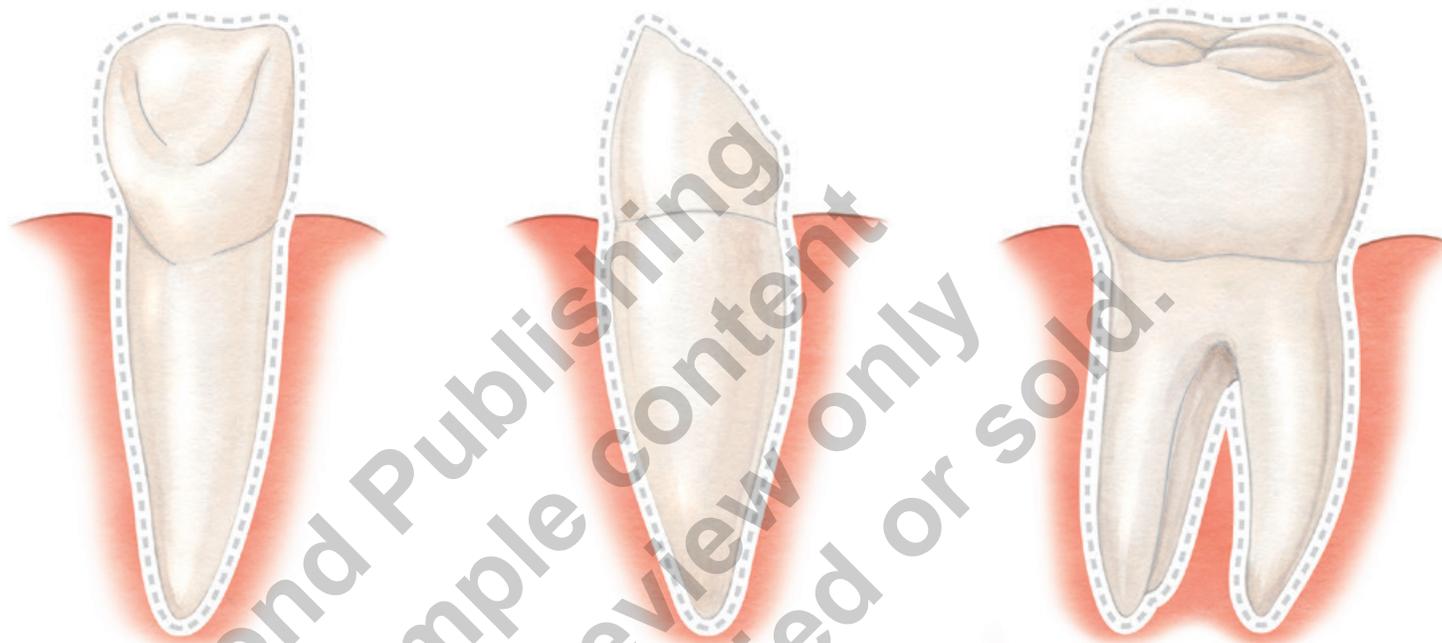

The pulp is inside the tooth.
It's soft and red. Ouch! Does
your tooth hurt? It's the pulp!

Trace and match.
